Online Exhibitor Planner - Pittcon Liquid - Wikipedia A liquid is a nearly incompressible fluid that conforms to the shape of its container but retains a (nearly) constant volume independent of pressure. Metal?Assisted Chemical Etching of Silicon: A Review ... This article presents an overview of the essential aspects in the fabrication of silicon and some silicon/germanium nanostructures by metal?assisted chemical etching. Nanotechnology - Wikipedia Nanotechnology ("nanotech") is manipulation of matter on an atomic, molecular, and supramolecular scale. The earliest, widespread description of nanotechnology referred to the particular technological goal of precisely manipulating atoms and molecules for fabrication of macroscale products, also now referred to as molecular nanotechnology. Nanotechnology Glossary N Nanoguitar: "Made for fun to illustrate the technology -- the world's smallest guitar is 10 micrometers long -- about the size of a single cell -- with six strings each about 50 nanometers, or 100 atoms, wide. Raman spectroscopy in graphene - ScienceDirect Recent Raman scattering studies in different types of graphene samples are reviewed here. We first discuss the first-order and the double resonance Raman scattering mechanisms in graphene, which give rise to the most prominent Raman features. Additive manufacturing: scientific and technological ... Additive manufacturing (AM) is fundamentally different from traditional formative or subtractive manufacturing in that it is the closest to the 'bottom up' manufacturing where a structure can be built into its designed shape using a 'layer-by-layer' approach rather than casting or forming by technologies such as forging or machining. Soft lithography for micro- and nanoscale patterning ... This protocol provides an introduction to soft lithography—a collection of techniques based on printing, molding and embossing with an elastomeric stamp.
