Answer Key -- What's Regular About Tessellations? tessellation is a design covering the plane made using 1 type of regular polygons. A semi-regular tessellation is made using 2 or more types of regular polygons. With both regular and semi-regular tessellations, the arrangement of polygons around every vertex point must be identical. This arrangement identifies the tessellation. For example, a regular tessellation made of hexagons would have a ... Tessellation Worksheet - University of Hawaii Tessellation Worksheet In this module, we will be exploring tessellations and try to explain why Honeybees always build combs using hexagons. What is a Tessellation? Tessellation Worksheet - EscherMath Tessellations. When polygons are fitted together to fill a plane with no gaps or overlaps, the pattern is called a tessellation. You have seen them in floor tilings, quilts, art designs, etc. Tessellation patterns can be made from one shape or from more than one shape; here our investigation will use one shape at a time.
